

## Legal framework

### Meteorological and climatological data of MeteoSwiss

As the national weather service, the Federal Office of Meteorology and Climatology (MeteoSwiss) is responsible for the comprehensive collection of meteorological and climatological data in Swiss territory. The provision of this data to a third party is made for a fee, correspondent to the Federal Act on Meteorology and Climatology (SR 429.1); hence this data is generally not freely available and usable. The fee and the terms of use of obtained data are laid down in the Decree on Meteorology and Climatology (SR 429.11), the general terms and conditions for standard range of services of MeteoSwiss as well as possible complementary contractual provisions.

Further legal indication can be found here:
